

WATER RESOURCES DESIGN MANAGER

Advanced Engineering & Design, Inc. is a full service engineering firm that specializes in serving public sector clients. We focus on meaning over metrics and prioritize the client experience as we pursue solutions to the challenges facing local governments. Our work shapes the communities we serve.

This year marks our twenty fifth anniversary and we are just getting started! As a small business enterprise (SBE) with a diverse technical portfolio, the opportunities are endless. We are seeking a professional looking to make their mark on a company. Whether its product line development or pursuing strategic growth opportunities, **Advanced Engineering & Design, Inc.**'s culture supports technical growth while scratching that entrepreneurial itch.

Compensation & Benefits:

- Salary DOQ
- Company Pays 100% of Employee Health Insurance
- Retirement Plan (with Company Match)
- Three Weeks PTO (Additional Days Awarded with Continued Employment)
- Paid Professional Registration & Licensing Fees

Responsibilities:

- Lead the Development of Technical Submittals / Construction Plans
- Project Management
- Scope & Contract Preparation
- Business Development
- Support Team Development

Qualifications:

- Florida Professional Engineer License
- 8+ Years Experience in Stormwater Management and/or Utilities Engineering
- Public Sector Design Experience
- Effective (Verbal & Written) Communication Skills
- Team First Mentality
