

**Advanced Engineering & Design, Inc.** is a full service engineering firm that specializes in serving public sector clients. We focus on meaning over metrics and prioritize the client experience as we pursue solutions to the challenges facing local governments. Our work shapes the communities we serve.

This year marks our twenty fifth anniversary and we are just getting started! As a small business enterprise (SBE) with a diverse technical portfolio, the opportunities are endless. We are seeking a professional looking to make their mark on a company. Whether its product line development or pursuing strategic growth opportunities, Advanced Engineering & Design, Inc.'s culture supports technical development and the growth of its individual team members.

## **Compensation & Benefits:**

- Salary DOQ
- Company Pays 100% of Employee Health Insurance
- Retirement Plan (with Company Match)
- Three Weeks PTO (Additional Days Awarded with Continued Employment)
- Paid Professional Registration & Licensing Fees

## Responsibilities:

- Support the Development of Technical Submittals / Construction Plans
- Program and Project Permitting
- Preparation of Specifications & Estimates
- Construction Observation & Inspection
- Communicate with Project Stakeholders

## **Qualifications:**

- Bachelor's or Master's Degree in Civil Engineering, Environmental Engineering or Related Area of Study
- 2+ Years Experience in Stormwater Management Engineering
- Public or Private Sector Design Experience
- Stormwater Modeling Experience Preferred (Various Programs)
- Effective (Verbal & Written) Communication Skills
